Is now the time that you make the decision to have braces as an adult? Please read the below article and see why...

More Adults Turning To Braces.

[US News & World Report](#) (7/27, Esposito) reported that an increasing number of adults are "getting braces to straighten their teeth, fix their bites and improve their smiles." According to the article, "this rising popularity" is due in part to "orthodontic options that make braces inconspicuous." The article reported that "adults made up a record high of nearly 1.5 million orthodontics patients in the U.S. and Canada," according to a 2014 survey from the American Association of Orthodontists.

MouthHealthy.org provides additional information for patients on [braces](#).
