Park Blvd Dentistry is pleased to announce the addition of our TRIOS scanner to the office. No longer will our patients have to go through those messy impressions. With the TRIOS scanner we are easily able to capture a scan of your entire mouth so that a crown, bridge or partial can be made.

What can be more simple? Have you put off a crown appointment because of your concerns over gagging or those messy impressions? Call us today to discuss how we can help you with your future treatment needs.
